High Definition Textured Panels

Premier EuroCase offers HD textured thermofused laminated panels with European trend-setting designs. HD textured panels deliver the look and feel of real wood along with the durability and reliability you've come to expect from PE panels.

Made with impeccable quality, the HD textured panels can be used in cabinets, office furniture and store fixtures. There are eight newly designed woodgrains and three solid colors available with the HD texture.

Why Röucke HD

- Use only the finest cores available to manufacture our laminated panels.
- Color, surface, and core qualities are consistent from panel to panel.
- Stock 4' x 8' panels, either 1/4" or 3/4" thick. Other thicknesses are available.
- The deepest texture produced in North America.
- Matching texture 1 mm ABS edgebanding available.

Some things never change.

With well over two million panels produced, from our first panel made in 2004 to the one that just came off the line today, you will receive the same high-quality panel that you have grown to expect.
