Product: Echo Wood® Quartered Maple
Echo Wood® provides endless opportunities in alternatives to our natural wood resources. Together we are committed to providing sustainable forestry land. Dehua TB New Decoration Material Co., LTD has wood veneers that are defect free and consistent responsible alternative produces architectural real any species you desire. This environmentally us to reproduce the natural appearance of nearly through computer design and technology enables the process of manipulating common wood fiber to the most exotic and rare species.

The Hardwoods Specialty Products LP offices are located near the 385,000 square feet engineered wood veneer factory to ensure high standards of quality and strict adherence to environmental guidelines. Dehua TB New Decoration Material Co., LTD is ISO 9001, and ISO 14001 certified for environmental management, and is certified by the Forestry Stewardship Council® (FSC®) for chain of custody. For more than nine decades Hardwoods Specialty Products LP has been providing quality hardwood products to North America. We remain steadfast in our commitment to worldwide sourcing of high quality wood products, excellent customer service, competitive pricing and sustainable forestry management.

The Hardwoods Specialty Products LP, one of North America’s largest hardwood wholesale distributors, has teamed with Dehua TB New Decoration Material Co., LTD for the exclusive distribution of Echo Wood® in North America.

Dehua TB New Decoration Material Co., LTD has quickly grown to one of China’s largest wood processing companies with nearly 3 million square feet of manufacturing facilities, and 250,000 acres of forestry land.

Together we are committed to provide sustainable alternatives to our natural wood resources. Echo Wood® provides endless opportunities in creating a range of looks from the most common, to the most exotic and rare species.

The process of manipulating common wood fiber through computer design and technology enables us to reproduce the natural appearance of nearly any species you desire. This environmentally responsible alternative produces architectural real wood veneers that are defect free and consistent in color and grain, time and time again.

Echo Wood® can be ordered laminated to your choice of substrates, and delivered to the fabricator for further processing. The fabricator may also do their own lamination by following the installation instructions below.

**INSTALLATION**

**SURFACE PREPARATION**

Echo Wood® veneers should be bonded to a high quality backer, plywood, Medium Density Fiberboard (MDF), Particleboard (PB) or similar product using a ridged glue line and following the directions of the adhesive manufacturer. The more resistant the substrates are to dimensional change (expansion and contraction due to humidity and temperature) the better the results. It is critical that Echo Wood® is properly acclimated a minimum of 48 hours along with the substrate and adhesive prior to fabrication. Contact cement can only be used with Echo Wood® veneers that have a phenolic backer or other backers that are approved for use with contact cement and should not be used with fleece or raw back veneer.

Before applying the Echo Wood® veneer, carefully inspect the face and back for oil, grease, wax, dirt, dust or other contaminants. The surface must be smooth, all holes, indentations, bumps or raised areas must be either filled or sanded smooth. For most panel products, a balancing backer should be used to avoid warping.

**FINISHING**

Echo Wood® veneers are primarily intended to have a clear lacquer, varnish, polyester or other standard finishing materials applied to them. Echo Wood® veneers can take a stain, but each species will have varying results. Test finishes on a sample before finishing a final product. Finish all edges to help retard fading or color change. Finishing materials applied to them. Echo Wood® veneers can take a stain, but each species will have varying results. Test finishes on a sample before finishing a final product. Finish all edges to help retard fading or color change.

**PROJECT CONDITIONS**

Care should be taken to ensure that Echo Wood® veneers/panels are installed in a project that has suitable environmental conditions (ambient temperature exceeding 65 degrees Fahrenheit and relative humidity of 40-60%).

**MAINTENANCE**

Finished surface should be cleaned and maintained in accordance with the recommendations of the finish manufacture’s specifications.

**GENERAL INFORMATION**

The Hardwoods Specialty Products LP, one of North America’s largest hardwood wholesale distributors, has teamed with Dehua TB New Decoration Material Co., LTD for the exclusive distribution of Echo Wood® in North America.

All Echo Wood® veneers meet the California Air Resource Board Phase 2 (CARB2) requirements for formaldehyde emissions.

- 10 mil paper - moisture resistant flexible
- 2 ply wood backer - flexible
- Duraback - moisture resistant flexible
- Fabric - drywall friendly, flexible
- Fleece flexible, non moisture resistant
- Phenolic - moisture resistant, rigid
- Polyback - phenolic replacement, moisture resistant flexible
- PSA - peel and stick, flexible
- Plywood - all patterns are available laminated to the plywood core of your choice. Most products are available prefinished.

### Environmental Attributes of Echo Wood®

- All Echo Wood® veneers are offered FSC® certified
- All Echo Wood® veneers meet CARB Phase 2 formaldehyde emission standards
- All dyes used in producing Echo Wood® are water based and contain no heavy metals
- 100% of the harvested fiber is used in the production of Echo Wood®
- Defect free panels offer maximum yield and minimal waste

### Quality Assurance

Hardwoods Specialty Products LP warrants the product to be free of defects, consistent of color and grain at the time of delivery to you. See Warranty Page.
Supplied-world-wide from our North American Distribution Centers

These stocking veneers are available for prompt shipment

ARCHITECTURAL DESIGN CREATIVE CONTROL PROGRAM

Create colors and grain patterns in the wood veneers to match, contrast or complement your design. Normally a 20 day turn around on new design creation. Material supply requires approximately 8-10 weeks lead time and 16,000 sq/ft minimum. Contact us to learn more about this unique creative opportunity.

A NOTE ABOUT COLOR

Echo Wood® images show the beauty of these reconstituted wood veneers as they will appear when finished with a clear coating. Raw unfinished veneers are several shades lighter in color.
STORAGE & HANDLING
All wood veneers are subject to ambient atmospheric conditions such as humidity and temperature. Optimum conditions for handling and storing Echo Wood® veneers are when ambient temperatures exceed 65 degrees Fahrenheit with a relative humidity of 40-60%. Echo Wood® veneers should be stored horizontally with a dark, non-transparent cover completely protecting them from UV light. Care should be taken to not fold, crease, dent, or scratch the veneers.

LIMITATIONS
Echo Wood® veneers are not recommended for exterior use or direct application to concrete or other similar products. Dyes used in the production of Echo Wood® veneers are sensitive to natural and artificial UV light. As with all natural woods, Echo Wood® may fade or change color with prolonged exposure to UV light. A UV inhibitor should be used with all wood products to help retain their original beauty.

LIMITED WARRANTY
Hardwoods Specialty Products LP warrants that Echo Wood® veneers are free from defects in materials and workmanship at the time of their delivery to you. Hardwoods Specialty Products LP will honor only those claims for defective material or workmanship that are reported to your distributor within 25 days from the date you accept delivery of the product in question. With respect to claims of defective product received within that period, your exclusive remedy for a loss or claim resulting from the use of Echo Wood® veneers shall be, at Hardwoods Specialty Products LP’s sole option, the repair or replacement of any such product proven to be defective. This warranty does not apply to damages resulting from faulty installation of the product or resulting from accident, alteration, misuse, tampering, negligence, or abuse. In no event shall Hardwoods Specialty Products LP be responsible for any incidental, special, exemplary and/or consequential damages, and any such damages, regardless of the legal theory upon which they are based, are hereby specifically disclaimed. This limited warranty constitutes the sole warranty provided by Hardwoods Specialty Products LP with respect to Echo Wood® veneers, and all other warranties of any kind, whether expressed or implied (including any implied warranties of merchantability or fitness for a particular purpose), are hereby excluded. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This Limited Warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
